Zoom / Google Integrations

Table of Contents

- [Integrate your Zoom Account](#)
- [Create a Zoom Meeting with Google Calendar](#)
- [Manage meeting settings from Google Calendar](#)

Integrate your Zoom account

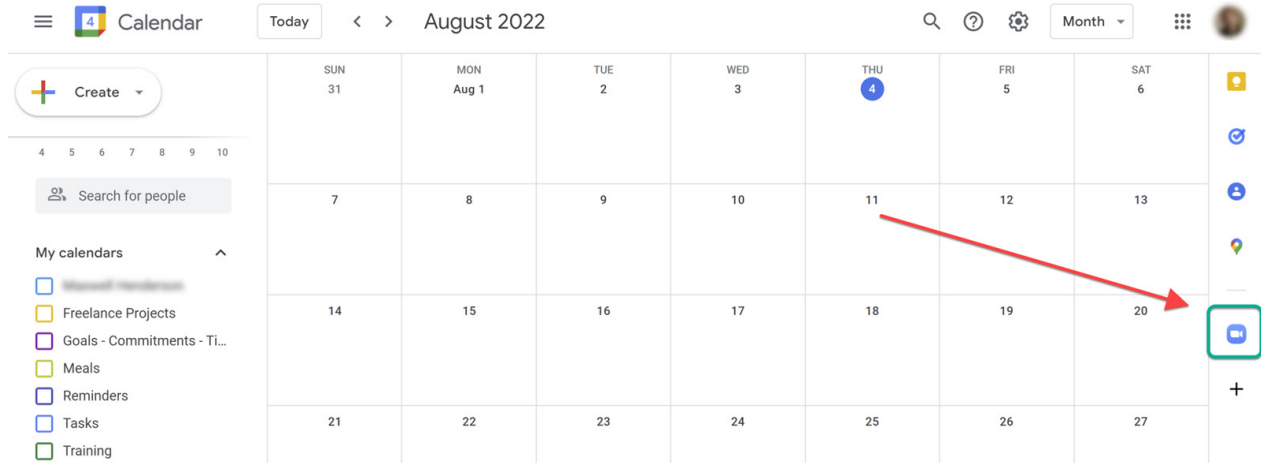

- » Go to Google Workspace Marketplace and install [Zoom for Google Workspace](#)

- » Sign in with your Google account and allow Zoom for G Suite or Google Workplace

USER GUIDE

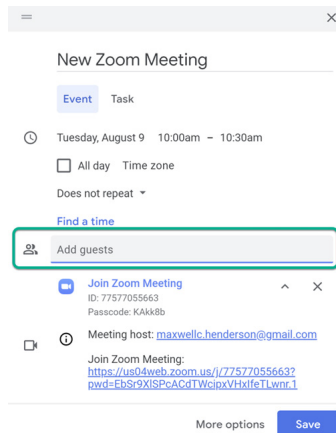

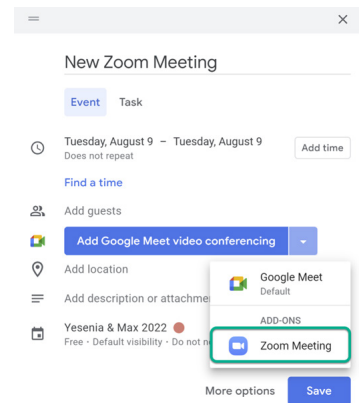

- » Open your Google Calendar and notice the Zoom app icon listed with your other apps. Select the zoom app and sign into your zoom account.

Create a Zoom Meeting with Google Calendar

- » Open Google Calendar and create a new event
- » Click the video conferencing options and select the option for Zoom Meeting

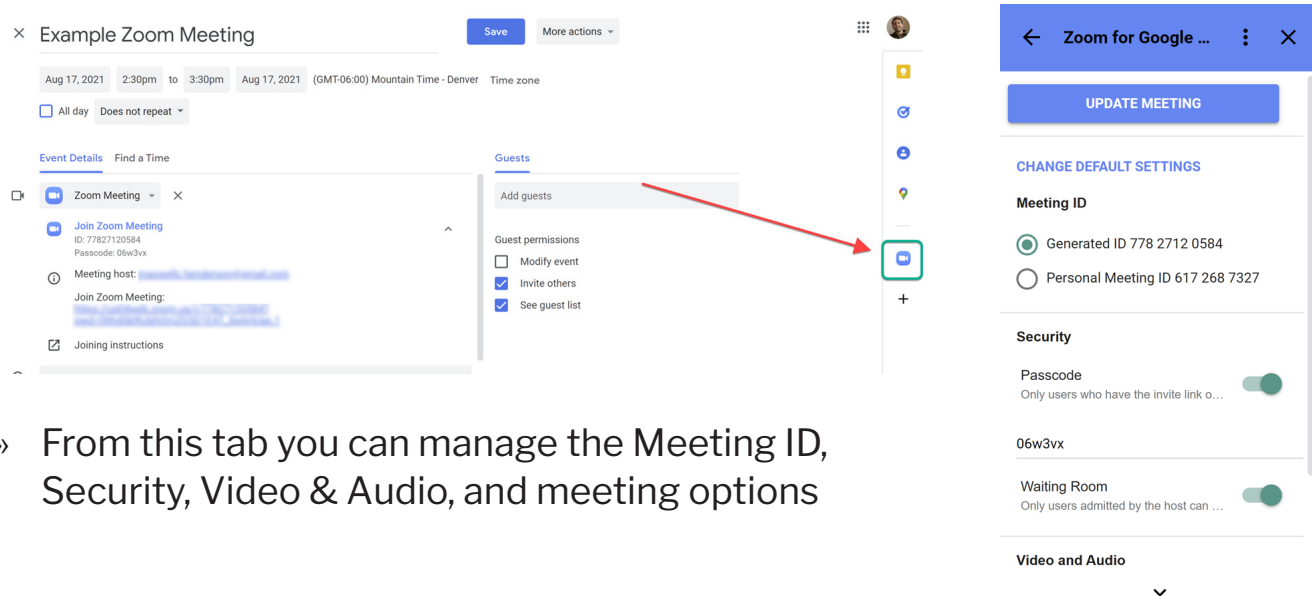

- » Add the email addresses of your guests and set guest permissions

Manage meeting settings from Google Calendar

- » To open the meeting settings, first select a meeting event in Calendar then click the Zoom icon on the right side of the screen

- » From this tab you can manage the Meeting ID, Security, Video & Audio, and meeting options

- » To manage the default settings, click the change default settings option, then log into your zoom account to access the default settings

- » Always click “Update Meeting” after making any changes
